

Technical Details

Haas OD Broach Tools

- Haas OD Broach Tools are made with quenched and tempered tool steel.
- The section that houses the insert is hardened to 58/60 HRC, making it very resistant to compression.
- The square shank holders are available in inch (1" or 3/4") or metric sizes (20mm or 25mm)
- No Programming required. Use the provided Haas VPS templates including templates specifically for gates profiles on your components using the unique G156 canned cycle.
- DX range of tools for right hand machining.
