To accommodate the large variation in size and shape of material that can be loaded by the APL, use the following guidelines and table dimensions to make your own part specific templates

- 1. Allow adequate space between rows and columns for gripper clearance
- 2. All rows must have equal spacing
- 3. All columns must have equal spacing (but can be different than row spacing)
- 4. Use dowel pins and/or screw holes to fix template to table

MAXIMUM PART SIZE

MAXIMUM PART WEIGHT 10lb [4.5kg] Per Gripper

*Maximum height assumes factory included Grippers.
Using other workholding will change the maximum part height
