Post-install Questions

Answer the following questions.

1. Verify the Inspection Report is completed and attached to the machine history.	
2. Run the Ball Bar test. Upload graphs to the machine history.	
3. Verify Tool Changer Test program has run through all pockets with no alarms.	
4. Test cut part and provide part feature dimensions. Upload the completed test cut report to the machine history.	
5. Take an Error report and Backup and attach to the machine history.	
6. Verify RMA and Tracking number for the lifting fixture and tool crate has been sent to Haas Service.	

Notes/ Observations:

Attach this report, an error report, and any relevant documentation to a service notification in the Haas Service App.
